

## WC 2006

**World Congress on Medical Physics and Biomedical Engineering** 

Aug. 27 - Sep. 1, 2006 COEX Seoul, Korea

"Imaging the Future Medicine"

The Triennial World Congress of IUPESM

The 15th ICMP of IOMP The 21st ICMBE of IFMBE

www.wc2006-seoul.org

Hosted by

| T22 S1 Neural Network & BCI   |                 | 5513. Invited Talk - "Wideband Current Source Structures for EIT"  | 08:30 |
|---|-----------------|--|-------|
| 08:00-09:30, Tuesday, August 29<br>Session Chairs : James Jungho Pak, Daryl Kipke   | 321C            | Ramon Bragos, Daniel Anton, <u>Pere Riu</u>  |       |
| 5001. Invited Talk – "Advanced Implantable<br>Microscale Neural Interface Devices"  | 08:00           | 5515. Invited Talk – "Reduction of Electrode<br>Position Errors in Clinical Imaging"   | 09:0  |
| Daryl Kipke   |                 | Camille Gomez-Laberge, Andy Adler, Chris McLeod  |       |
| 5003. Electrical Stimulation Induced Neuronal<br>Clustering in Cultured Neural Network<br>Sung June Kim, Jae Kyoo Lee, Jong Keun Song,<br>Sang Beom Jun | 08:30           | 5516. Preliminary Report of Optimisation of In-<br>Vitro Studies with an In-Vitro Specimen<br>Measuring System<br>Marwan Al-Akaidi, Martin Brien, Wei Wang, <u>Li Wang</u> | 09:3  |
| 5004. Finding Directional Movement  | 08:45           |  |       |
| Representations in Motor Cortical Neural Populations Using Nonlinear Manifold   |                 | JC2 S4 Mobile Healthcare System  |       |
| Learning<br>Michael Black, John Donoghue, Odest Jenkins,  |                 | 08:00-09:30, Tuesday, August 29  | 320I  |
| John Simeral, <u>Sung-Phil Kim</u>  |                 | Session Chairs: Toshiyo Tamura, Wooshik Kim  |       |
| 5005. Neural Network Model of Cell Survival under Hyperthermia  | 09:00           | 5615. Invited Talk – "Smartphone-based<br>Approach for Monitoring Vital Physiological<br>Parameters in Humans"   | 08:0  |
| A.G. Trofimov, O.A. Mishulina, <u>Vladimir Kosterev</u>   |                 | Igor Sergeev, Maxim Jatskovsky, Garik Markarian,   |       |
| 5016. Wireless Telemetry for Micro<br>Intracortical Neural Implants   | 09:15           | Sergey Schookin, Alexander Kobelev, <u>Oleg Medvedev</u>   |       |
| Daryl Kipke, Rushali Parikh, <u>Jongwoo Lee</u>   |                 | 5616. Invited Talk – "Optimal Body Area<br>Network for u-Healthcare"   | 08:3  |
|   |                 | Pil June Pak, Soo Jin Huh, <u>Dong Ik Shin</u>   |       |
| T22 C2 1 1/2 LTC II 11  |                 | 5618. Ambulance Service Area Placing with  | 09:0  |
| T23 S3 Invited Talk II  |                 | Overlapped Efficiency Indexes  Shu-Wen Chen, Yung-Tang Shen, <u>Dah-Ming Shiah</u>   |       |
| 09:00-09:30, Tuesday, August 29<br>Session Chairs : Kwang-Sup Soh   | 308             | Shu-wen Chen, Tung-Tang Shen, <u>Dan-Ming Shian</u>  |       |
| •   |                 | 5619. MDoctor for DM: Development of<br>Ubiquitous Healthcare System for Diabetes  | 09:1  |
| 5111. Magnetic and Bio Electrical Signal<br>Measurement at Acupuncture Treatment in   | 09:00           | Self-Management  |       |
| Human   |                 | Hyun Soon Ahn, Jin Tae Kim, Sang Kyung Lee,  |       |
| Kyuseok Ahn, Jinseok Moon, Young Huh, Eehwa Kim   |                 | Se Hyun Han, Kye Hyun Kim, <u>Kwan Yoo Kim</u>   |       |
| Sang Yong Jeong, Sung Tae Koo, Yeonhee Ryu, <u>Sun M</u>  | <u> 1i Choi</u> |  |       |
|   |                 |  |       |
| JC1 S4 Instrumentation I  |                 | C • • • • • • • • • • • • • • • • • • •  |       |
| 08:00-09:45, Tuesday, August 29<br>Session Chairs : Hermann Scharfetter   | 320C            | Symposium 3 (08:00 - 09:30)  |       |
| 5517. Invited Talk – "Study and Comparison of the Repeatability from Different Bio-Electrodes under Various Conditions for EIT"                         | 08:00           | SY 3 Women in Medical and Biological<br>Engineering: Worldwide Perspectives  |       |
|   |                 | 08:00-09:30, Tuesday, August 29  | 40    |
| Mawan Al-Akaidi, Martin Brien, Li Wang, <u>Wei Wang</u>   |                 | Organizer : Maria Siebes   | 10    |

Planar microelectrode arrays (MEAs) have been used to provide a means for long-term, simultaneous recording of electrical activities from neural networks. Using microcontact printing, we produced grid neural networks on MEAs previously. However, action potentials were not always recorded from the electrodes even though neurons were observed on nearly the electrode sites. This inefficiency for functional recording sites may be an obstacle for optimal MEA use. One possible contributing factor for this observation is low neuron density since neurons in vitro may have far fewer synapses when compared to neurons in vivo. At lower densities neurons may not receive sufficient synaptic input to develop into functional networks. Therefore, we hypothesized that electrical stimulation on neural network might provide greater neurotransmitter release and promote neuronal growth. By using an ASIC chip, we developed a portable current stimulator which can deliver biphasic current stimulation with programmable parameters (amplitude: 2~1024 μA, pulse width: 10~320 μs, pulse rate: 10~800 Hz). The amplitude and pulse width were fixed within a safe range preventing neuronal cell death. And the effects of various stimulation rates were examined. After stimulating neurons for several days during culture days, neuronal clusters were produced around the stimulating electrode site. This result will be presented as a movie clip. We also accessed firing rates of signals recorded from the electrode. The neuronal clustering in neural networks were visualized by using immunocytochemistry.
